

Collagen Dressing

(HCPCS A6010)

Preventative Chronic Wound Care

For patients and providers, the initial phase of treating a post surgical wound to prevent it from becoming chronic is often the most difficult. Patient compliance and proper at home care need to be aligned in order to achieve the most optimal treatment outcomes. Our products are RX only.

Collagen Sheet (A6021, A6023)

Collagen sheet topical dressings are designed for full coverage of chronic or traumatic wounds.

15 per box

Product	Size	Q Code
Rx Only Topical Collagen Sheet (in)	2 x 2	A6021
	4 x 4	A6021
	7 x 7	A6023
	5 x 10	A6023

Collagen Powder (A6010)

Topical Collagen Powder Dressings are absorbent type 1 microfibular bovine collagen dressings indicated for the management of moderate to heavily exuding acute and chronic wounds. Collagen Powder Dressing forms a gel on contact with exudate that provides intimate contact with the wound surface that helps to control minor bleeding, and provides a moist, physiologically favorable wound environment that encourages wound healing. Collagen Powder Dressing is applied directly to the wound to act as a wound filler and to absorb exudate and exudate components that may impair wound healing.

15 per box

Product	Size	Q Code
Rx Only Topical Collagen Powder	1 Gram	A6010
